### Security and Privacy Awareness Training Contractor / Affiliate Personnel Security Certification

**Purpose:**  
This training document is to be signed by contractor, subcontractor, or affiliate personnel, and those acting on behalf of the Social Security Administration (SSA) who have been granted access to SSA information and information systems to certify that they have received and understand SSA Information Security and Privacy Awareness Training detailed below.

**Background:**  
SSA is vital to the economic security of the United States. In the performance of their duties in support of SSA's mission, all contractors, subcontractors, affiliates, and those acting on behalf of SSA who have been granted access to SSA information systems, hereafter referred to as "Authorized Users(s)," are responsible for protecting such information and information systems (e.g., hardware, software/applications, federal information/data, network, people) throughout the entire information life cycle, including collection, processing, maintenance, use, sharing, dissemination, or disposition of information. Federal information includes information created, collected, processed, maintained, disseminated, disclosed, or disposed of by or for the Federal Government, in any medium or form.

Security awareness training is required for Authorized Users, per Section 44 USC 3554 of the Federal Information Security Modernization Act of 2014 (FISMA). Failure to follow prescribed rules or misuse of federal information and information systems can lead to criminal penalties, including fines and imprisonment, and disciplinary actions according to the contract and/or agreement under which I am performing work for SSA.

I understand that SSA maintains a variety of sensitive information about the agency's operations and programs, which may be information pertaining to program (e.g., information about SSA's clients) or non-program (e.g., administrative and personnel records) matters. I understand that SSA may authorize me to have access to federal information and information systems and that my access to and use of such information and information systems must be in accordance with the provisions of the contract and/or agreement under which I am performing work for SSA.

I understand that the terms in the contract and/or agreement under which I am performing work for SSA take precedence over this document. I understand that any questions I may have concerning authorization(s) to access SSA information and information systems should be directed in accordance with the terms of the contract and/or agreement. I have read, understand, and agree to the following conditions:

**Insider Threat**  
An insider threat is someone with authorized access who uses that access, intentionally or unintentionally, to harm the security of the Agency or the Nation. The individual with authorized access may attempt to willingly or unwittingly harm the security of the agency through espionage, terrorism, unauthorized disclosure of sensitive information, or the loss or degradation of agency resources or capabilities.

- If I observe a potential insider threat, I will report the incident to [SSAIFT@ssa.gov](mailto:SSAIFT@ssa.gov) and, as appropriate, in accordance with the personally identifiable information and incident reporting requirements in the contract or agreement under which I am working.
- I will safeguard federal information and information systems from exploitation, compromise, espionage, terrorism, or other unauthorized use and disclosure.
